

## JL Freight HVTT (High Value Theft Targeted) transport policy.

The transportation of HVTT products brings serious risks not only for the customers but also for the drivers and the transport companies. Security measures need to be taken in advance in order to mitigate the risks of accidents and act adequately if such occurs. With our long term experience in carriage of Fashion, ADR 1, Pharmaceutical, Tobacco, and Tech products on the territory of EU and Turkey our team understand the risks and responsibilities. In order to uphold its high standards in these sectors and to show its commitment JL Freight Ltd. undertook training in the TAPA TSR 2017 Level 1 requirements in 2018.

### **OUR ENGAGEMENTS:**

1. In house Monitoring Center with dispatchers – 24/7.
2. Emergency procedures in place.
3. All accidents are immediately investigated.
4. No subcontracting.
5. Technologically up-to-date equipment.
6. Team of trained highly qualified and motivated staff that can immediately and professionally solve any problem.
